- **Internship**

- **Codegriq**

- Data Science Using Python

Projects

Restaurant

Revenue Prediction

The primary objective of Restaurant Revenue Prediction using Machine Learning is to help restaurants make a more informed and optimal decision about opening new outlets

Simple Animation to Race a Drunk Man from Start to Finish

This is an interactive console animation app, where our choice of character (any letter from a to z) will appear to move funnily from start to finish line. If he finishes the race within the specified counter (in our case, 1000000), then we print a particular message, else another message.

Education

- **Masters of Computer Application (2021 - 2023)**
